Pre-Doctoral Fellow (joint with RDCEP)

Chicago, IL and remotely from New York, NY as GISS Visiting Researcher

- Conducted interdisciplinary research on how climate variability will impact society (agricultural yields, mortality, energy consumption) and how to improve weather projections used in climate impacts studies, with Prof. Amir Jina
- Adapted latest downscaling and bias-correction methods to impacts studies, sensitivity tested common economic damage functions to climate variability changes, quantified effect of internal climate uncertainty on climate damages
- Advised on the use of climate model and observational data in economics and policy applications

Center for Robust Decision-Making on Climate and Energy Policy (RDCEP)

April 2015 – July 2019

Pre-Doctoral Fellow (joint with EPIC 2017-2019)

Chicago, IL and remotely from New York, NY, and Beijing, China

- Researched changes in precipitation and temperature variability from synoptic to inter-decadal timescales in global climate models in Prof. Elisabeth Moyer's climate statistics group
 - Co-organized a weekly interdisciplinary speaker series on energy and environmental themes attended by ~25 young researchers and students to foster collaboration across geophysics and economics research communities
